

Behavioural ABCs

Understanding Behaviour

The ABCs of Behaviour

In order to promote behaviour change, it is important to fully understand the behaviour itself. One way to better understand a pattern of behaviour is to track the 'ABCs'. Tracking a behaviour this way can give us insight into how we can change environmental factors, our own behaviour, and consequences in order to promote behaviour change

When directly observing a behaviour, record the ABCs on a data sheet. See example below.

When and Where	Antecedent	Behaviour	Consequence
Monday 7:00am Home	<ul style="list-style-type: none"> • Sally yawned and said "I am tired" • loud music is playing • parent is busy washing dishes 	<ul style="list-style-type: none"> • Sally reaches toward the snack cupboard • Sally screams and cries with tear 	<ul style="list-style-type: none"> • parent turns around and says "oh you want a snack" • parent gets a cookie and gives it to Sally
