

FIRE PREPAREDNESS

If I see a fire or hear the fire alarm, I will stay calm.

Staying calm helps me think clearly and follow the safety steps.

I will stop what I am doing and head towards the nearest exit, just like the way I practiced during fire drills with my staff and housemates.

In a fire, we always use the stairs. We should never use the elevator.

Once we are outside, I will go to the designated safe space.

If I don't know where the safe space is, I will stay with staff or with the crowd.

Once I am in the designated safe space, it is important that I stay there so everyone knows where I am.

I will wait for emergency services to arrive.

We will all wait until it is safe and are told that we can go back inside.
