

MY CLINICAL TEAM AT KERRY'S PLACE

My Kerry's Place Clinical Team includes several people who are there to help me. This includes: a Registered Behaviour Analyst, Clinical Therapists, and possibly a Clinical Technician.

I will have a Clinical Support Plan, and I am always involved in creating it.

The Clinical Support Plan includes ways to help me learn new skills, and ways to keep me safe.

All behaviour support strategies must be evidence-based, least intrusive and most effective practices based on Applied Behaviour Analysis (ABA).

My support strategies promote positive change for me.

Staff are trained and supervised to follow my plan, and record my progress to make sure I am learning. My Clinical Team monitor my progress and make changes if necessary.
